Professional Practice, Research and Education

- The Professional Practice Portfolio is an interprofessional support service, aligned with the mission, vision, and values of the organization. The Professional Practice Portfolio is comprised of advanced practice clinicians who support health professionals in their practice.

- The Professional Practice Portfolio provides leadership to enhance the capacity of health professionals to provide compassionate, high quality and family driven care, in partnership with the clinical program and support departments at NYGH.

- We are leading the way to building an interprofessional, collaborative practice culture that fosters clinical excellence and innovation in patient/family driven care.

Legislation Governing Nursing Practice

The Regulated Health Professions Act, 1991 (RHPA) sets out a framework for Ontario’s regulated health Professions. The RHPA framework sets out two elements:

1. Scope of practice statement
2. Series of controlled or authorized acts for each profession

(CNO, 2012)
Professional Standards, CNO

• Accountability
• Continuing competence
• Ethics
• Knowledge
• Knowledge application
• Leadership
• Relationships:
  ➢ Therapeutic nurse-client relationship
  ➢ Professional relationship
Professional Nursing Practice

Professionalism is characterized by one’s level of knowledge, specialization, intellectual and individual responsibility, accountability, autonomy, inquiry, collegiality, collaboration, innovation, ethics and values, and sense of group consciousness (RNAO, 2006)
Utilization of RNs & RPNs

3-FACTOR FRAMEWORK
THE CLIENT

Client Factor Three components:

- complexity
- predictability
- risk of negative outcomes
NURSE FACTOR

- One profession
- Accountability
- Foundational knowledge
- Enhanced knowledge
- Autonomous practice
- Consultation
- Collaboration

CNO, 2013
Consultation outcomes:

- The nurse gets advice and continues to care for the client
- The nurse transfers part of the care to the consultant, or
- The nurse transfers all care to the consultant.
ENVIRONMENT FACTOR

Three components:

- practice supports
- consultation resources
- stability and predictability
