

MEMO

RE: Genetic Analysis of Infertility

Effective December 1st, 2020, the Cytogenetics Laboratory at North York General will **only** accept the following indications for infertile couples for chromosome analysis:

- Azoospermia or oligospermia
- Early or premature menopause
- Short stature in women
- Clinical signs of genetic disease, eg. Klinefelter syndrome, Turner syndrome
- A family history of chromosomal abnormality

An updated Cytogenetics Requisition will be available on December 1st, 2020 on the North York General website.

If you have any questions or concerns, please contact the Laboratory Geneticist Dr. Hong Wang at (416) 756-6796, or hong.wang@nygh.on.ca.
